ACTIVE HYGIENE

# XEPI™ Rub CET

## Dry Hand Rub / Skin Antiseptic

### Composition:

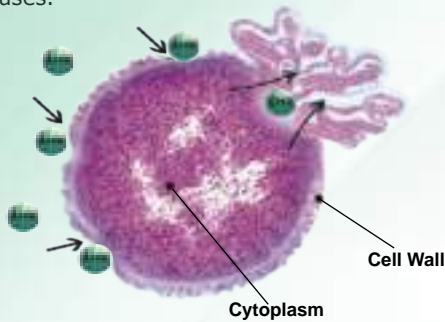

#### 100 g solution contains:

Chlorhexidine Gluconate Solution	I.P.	2.5% v/v
Equivalent to Chlorhexidine Gluconate		0.5% w/v
Ethyl Alcohol	I.P.	70% v/v
Emollients and Moisturizers		

### Antimicrobial Activity:

XEPI Rub CET has substantivity and allows for a longer duration of broad spectrum antimicrobial activity against Gram-positive and Gram-negative in 30 seconds.

XEPI Rub CET is a complete bacteriostatic and bactericidal (MRSA), fungicidal and tuberculocidal hand rub and also against lipophilic viruses.

XEPI Rub CET penetrates into bacterial cytoplasmic membrane and gives lethal action on all microorganisms.

### Mode of application:

Wherever rapid hand disinfection is required, use undiluted.

#### Hygienic Hand Disinfection:

Use 2-3 ml XEPI Rub CET to wet hands and nail grooves.

#### Surgical Hand Disinfection:

Use 6 ml XEPI Rub CET well over clean dry hands nail grooves up to elbows.

#### Skin Anti- sepsis:

Apply XEPI Rub CET on operative, perioperative skin regions and elbow to dry for 30 seconds before incision. Paint skin 2-3 times for best results.
